

Speed Automatic Mineral Water Filling Machine CGF18-18-6

The machine is used for producing drinking water in PET bottle, like pure water, mineral water, natural water and so on.

Adopting hanging-neck technology, it can transfer the plastic bottle more stably and fast.

One machine can finish washing bottle, filling and capping three processes, sanitary and high-efficiency.

High-quality filling valve guarantee the filling level precision.

Machine is controlled by PLC automatically, all the electrical element are world famous brand, making sure the machine work stable.

Specifications:

Model	CGF18-18-6
Rinsing head	18pcs
liquid filling head	18pcs
Capping head	6pcs
Capacity	6,000bph (500ml)
Washing pressure	0.2-0.3Mpa
Filling pressure	0.3-0.4Mpa
Filling Temperature	Room temperature
Filling style	Mico Low Negative Pressure filling
Compressed air	0.5-0.6Mpa
Water consumption	3t/h ex beverage water
PET bottle type	Bottle dia.φ50-φ90mm Bottle height. φ160--φ340mm 200ml-1.5L
Suitable cap type	Screw cap
