

PZR8-200LS Automatic Packaging Machine for Liquid Sauce

This set of equipment is mainly composed of a rotary bag automatic packaging machine and a liquid and sauce filling machine. Mainly used for: automatic packaging of liquids, sauces, pastes such as detergents, juices, hot pot bottoms, ketchup, peanut butter, jam, chili sauce, bean paste and other materials.

Features:

1. Fast packaging speed and stable performance. Enables the company to automate packaging, thereby increasing production efficiency and significantly reducing production costs.
2. Man-machine interface (PLC+HMI) control system, realizes electromechanical integration, and is easy and convenient to operate.
3. Adjust the bag width by motor control, press and hold the control button to adjust the width of all machine clips at one time, easy to operate, save time and effort.
4. The packaging material has low loss, the machine uses prefabricated bags, the packaging bag has beautiful patterns and the sealing quality is good, thus improving the product grade.
5. Bag stirring device to prevent precipitation of micro-particle material.
6. With liquid level control device.
7. Waterproof flush design makes cleaning more convenient.
8. Servo motor control quantification, speed and capacity can be adjusted directly on the touch screen.

Technical Data:

Model	PZR-200LS
Bag materials	Composite film PP/PE aluminum foil
Bag type	Stand-up pouch, flat bag, zipper bag, retort pouch
Bag size	W: 80-200mm L: 100-350mm
Filling range	≤1000g
Precision	≤±1%
Packing speed	40-80 bag/min. (Speed is determined by the material itself and the weight of the fill)
Voltage	380V 50Hz
Total Power	3kW
Compressed air	0.6m ³ /min (provided by user)
