

BG-40C Automatic Tea Box Plastic Square Cup Box Filling And Sealing Machine

Automatic filling and sealing machine adopts stainless steel body PLC control, automatic filling, putting film, sealing are completed in one time, touch screen interface is stable and reliable strictly meet the requirements of food hygiene. This machine is suitable for large production enterprises, mainly use cup, box, bowl to fill milk, yogurt, jelly, instant noodles, lotus root starch, rice noodles and other food, beverage filling sealing, can also be used for other special-shaped cup sealing. Automatic filling, automatic partial, automatic sealing, automatic cup; Imported stepless variable speed system can adjust the production speed; CAM indexer is adopted to make the lower film positioning accurate and the machine runs smoothly. Cover sucking and sealing are completed at the same time, and the movement of the lower film has no effect on the positioning accuracy of the cover film. Accurate secondary sealing, sealing pressure can be adjusted, sealing strength is good; It is simple and safe.

Technical Parameters:

Product model	BG-40C
The power supply voltage	AC 220V/50HZ
Heat sealing power	3.3KW
The sealing speed	2400-3000cups/hour
Filling accuracy	±1%
Operating temperature	0-400°C
Sealing material	PE PP PET/PE
Overall dimensions	3300×650×1600(mm)
Net weight	550KG
