Semi-Automatic Tabletop Labeling Machine YQTB-80

Feature

- Adopt imported electromagnetic clutch with best accuracy.
- The machine shell adopts high-class aluminum alloy anodic treatment, with long life span service.
- Adopt famous factory electric motor to ensure high load and long period operation.
- All parts and standard components are carefully made of stainless steel.
- With PLC control panel, liquid crystal display, the operation is simple and convenient, the function is stable.
- Imported label inspection optical coupler can ensure high precision.
- There is a code printer on the machine (option), so the machine also can print three lines like the expire date, valid date, batch number etc.

Technical Parameters:

Labeling Speed	1200-2400pcs/hour
Labeling Accuracy	Less than 1mm
Round Bottle Size	Outer dia:40-120mm, Height: 10-120mm
Max Labeling Width	10-120mm
Max Labeling Length	20-500mm
Inner Core Size	Inner diameter: 70mm/ Outer diameter: 300mm
Power	220V, 50HZ, 100W
Machine Size	600*600*650mm
Machine Weight	45Kg
