

DTG Semi-automatic Paste Filling Machine

This machine is mainly designed and produced for the sauce distribution of the food industry. It is especially suitable for chili sauce, bean paste, peanut butter, sesame paste, jam, butter hot pot bottom material and red oil hot pot bottom material with granules and high concentration in the seasoning. Filling of viscous sauces with other substances.

Product introduce:

The series of filling machines are reasonable in structure, compact in size, reliable in performance, accurate in quantitative and easy to operate. The power part adopts pneumatic structure, and all adopt domestic famous pneumatic components. The material contact parts are made of 304 stainless steel and meet the requirements of GMP certification. The use of increased mixing hopper, the hopper volume can reach 120L, independent aluminum shell copper core stirring motor, frequency control; can be adapted to the filling of various sauces. The filling amount and filling speed can be arbitrarily adjusted within the range of the model according to the user's needs, and the filling accuracy is high. The filling head is made of anti-drip device.

Technical Parameters:

Model	DTG-500	DTG-1000
Power	550w	550w
Air pressure	0.5-0.7Mpa	0.8-1.1Mpa
Filling volume	0-500ml	500-1000ml
Filling speed	≤20 bottles/min	≤15 bottles/min
Error	≤5g	≤5g
Exterior	All stainless steel and aluminum profiles	All stainless steel and aluminum profiles
Size	1200*450*650mm	1400*450*650
Filling material	Granular sauce
