

Automatic Filling Machine with One Filling Head Gear Pump Filling Machine CM-CLB

Application

Cooling oil, panacea, foundation cream, hair wax, disc lipstick, lip-gloss and other packaging products.

Features

- The filling machine is suitable for quantitative filling of various liquid (paste) products such as cooling oil, panacea, foundation cream, hair wax, disc lipstick, lip-gloss and other packaging products.
- The interlayer heating of the barrel can ensure that the raw materials are heated evenly. The pump and filling nozzle are independently heated, and there is no heating dead angle.

- Through the gear pump motor piston type quantitative filling method, the filling is more stable and fast, and the low noise makes the production environment more comfortable.
- The barrel is lifted and lowered, and PLC program control makes the operation simpler and the staff easier to use.

Technical Parameters:

Power supply	1P/220V/50Hz
Installation requirements	220V power supply+air source+10kg heat transfer oil
PLC	XINJIE
Touch screen	Touchwin
Stirring speed	0-90 rpm
Power	2.2KW
Filling barrel volume	20L
Production capacity	20-60pcs/min (Depends on the filling volume and formula)
Overall size	L800mm*W820mm*H1600mm
