

Reliable Protein Powder Filling Machine TT-F1/TT-F2

This machine is versatile and adaptable to a wide range of powder packaging needs, including but not limited to protein powder, milk powder, coffee powder, cocoa powder, spice powder, fruit powder, corn flour, and more.

Features

- **Efficient Automation:** Our machine seamlessly handles weighing, filling, and conveying tasks automatically, ensuring precise operations without manual intervention.
- **Full Automation Capability:** It integrates smoothly with complementary equipment such as capping, labeling, and foil sealing machines, enabling complete automation for streamlined production processes.
- **Wide Applicability:** Versatile and adaptable, our machine caters to diverse packaging needs, accommodating various materials with ease.
- **Robust Construction:** Crafted from durable steel and engineered with a scientifically designed structure, our machine ensures stability, longevity, and minimal noise output, even in demanding environments.
- **Premium Components:** Equipped with top-quality electrical components sourced from renowned brands like Siemens, Mitsubishi, Panasonic, and Schneider, our machine guarantees reliability and performance.
- **All kinds of warning system and human protection system are provided,** to achieve aim of safe and efficient production.
- **Backed by a one-year warranty,** with free parts replacement in case of any quality issues.

Technical Parameters

Machine Model	TT-F1	TT-F2
Filling range	10-1000g	10-1000g
Filling speed	10-20 b/m	20-30 b/m
Power	3 phase 220v/380v, 50/60hz
