

Fruit Hard Candy Production Line HTL-T380/380II

Fancy candy production line, commonly known as flower cutting sugar production line, is a new production line newly developed by our company. The production line is a fully automatic complete plant for making different kinds of die-formed Fancy hard candies. At present, the production capacity can reach 1-2 tons / shift. Its key equipment: 250 vacuum sugar boiling unit, forming brace slicing unit, automatic rod inserting unit, etc. The key performance indicators have reached the advanced level. Especially automatic rod inserting unit and large diameter (Φ 80-100) slicer. Its stand-alone machine and production line are used by many candy manufacturers and exported to the Middle East, Africa, Southeast Asia, India, Russia and other countries and regions, which are highly praised by major enterprise users.
