

YL-480 Cellophane Overwrapping Machine

YL-480 Cellophane Overwrapping Machine is widely used in the packaging of various single-piece large-box items or multiple small-box items (with gold cord) in the industries of medicines, health products, food, cosmetics, stationery, audio and video products.

Performance characteristics

1. The work of the machine is completed by a series of servo motors inside the machine to drive various connecting rods and components.
2. It adopts multi-function digital display frequency conversion stepless speed regulation, PLC programming control technology, automatic box feeding, automatic counting, and touch display realization.
3. Man-machine interface, pneumatic drop film; and can be used in conjunction with other production lines

Technical Parameters

Package material	BOPP smoke film and gold cable
Speed	35-50 cks/min
Product size mm	(L)100-360×(W)50-230×(H)25-130mm
Power of supply	AC220V 50Hz, (single phase)
Weight	850kg
Power consumption in KW	6kw
Outline dimensions (Lx W x H)	(L)2320×(W)980×(H)1830mm
