

ZHSL- 250 One-side Flat bottle Labeling Machine

Core work principle: the sensor detects the product in place or foot issued a product in place signal, sucking the label of the tip drop label and standard, and then return to the original adsorption of the next label, waiting for the next label signal, a label The attachment action is completed.

Applied to one-side flat bottle labeling of industries of foodstuff, pharmaceutical and cosmetics, etc.

1. One side labeling for rectangular, square bottles, and elliptical bottles.
2. Controlled by computer (PLC) and touch screen control panel, so to achieve easy operating.
3. With volume of 0 to 5L.
4. Labeling speed range: 0~26 meter/minute

Major Characteristics:

1. This labeling machine is suitable for foodstuff, cosmetic, pharmaceutical, pesticide and other lines.
2. One side labeler for rectangular bottles and square bottles. It is automatically controlled by computer (PLC) and touch screen control panel, so to achieve easy operating.
3. If there is no bottle, it will not label. More than ten groups of labeling parameters can be memorized.
4. The specifications can be easily changed. Servo motor helps to realize closed-loop control. It has advantages like low malfunction rate and high efficiency as well as fast speed.

- Economic and effective
- Applied to all kinds of flat bottle one-side labeling
- High efficiency, nicety setting
- Easy to operate, run reliably
- Power supply : 220V, 56-60HZ
- Dimensions : 1850×1250×800MM
- Net weight : 200KG
