

A910 Side Labeling System

A910 is an ideal choice for the cosmetic, food and beverages, pharmaceutical and other light industries automatic side labeling on oval shaped or rectangular shaped containers. Wrap-around belt, pneumatic wrap-around station and turn-table wrap-around station is optional for wrap-around labeling on the round bottle.

- A dual-function labeler for wide range of applications: Simple adjustment to swap between side labeling mode and wrap-around labeling mode.
- One labeler to handle three different shapes of bottles (rectangular, oval, round) with large size ranges, and also achieves wrap-around labeling.
- Design features to ensure precise and smooth labeling on oval or rectangular bottles:
 - An alignment device composed of a pair of side chains to ensure symmetrical alignment of bottles along the center line.
 - A top conveyor belt at synchronized speed with the main conveyor to hold the bottles in place to maintain bottle alignment and stability throughout the labeling process
- Optional special label sensor for detection of film transparent labels.
- Optional registration features to cater for specific labeling requirements.

Technical Parameters

Model :	A910
Name :	Side Labeling System
Capacity :	50-240 pbm
Weight :	600kg
Electricity:	220VAC±5% 50Hz 1.1kW
Dimension(for reference) :	(L)2,400×(W)1,100×(H)1,540 mm
