

LFGA-022 Automatic Vegetable Seeds Bottle Filling Sealing Capping Machine Line

This line suitable to pack materials in the fields of pharmacy industry, food industry and daily industry. Fill salt, pepper, sugar, oatmeal, soup, seeds, coffee, instant drinks and much more.

Features:

1. This production line adopts automation technology, imported PLC, imported inspection light eye, frequency converter and other electrical appliances, and pneumatic components. It has the characteristics of high efficiency, intelligence, wide adaptability, and good stability.
2. It adopts automatic bottle feeding, linear filling machine, can sealing machine, and bottle collecting machine to form a fully automated production line.
3. The machine frame of the whole line is made of SUS304 material, which is beautiful and durable.
4. Stable operation, low noise, convenient maintenance, fully comply with GMP certification, widely used in medicine, food, and other industries.
5. Imported PLC and 7-inch touchscreen man-machine interface, easy to operate.

Specification:

Model	LFGA-022
Filling Speed	10-20 Bottles / min
Bottle diameter	Φ30mm-Φ135mm(customizable)
Bottle height	40mm-200mm(customizable)
Control system	PLC
Total lines power	6.8KW
Power supply	220V、50Hz
Airconsumption	0.6m³/min
Equipment material	304 stainless steel
