

MIC-20B Automatic Shrink Packing Machine

In modern industries, efficient and secure product packaging is essential for ensuring product protection and presentation. MIC Machinery introduces the MIC-20B Automatic Shrink Packing Machine, a high-performance shrink packaging solution designed for fast and reliable shrink wrapping at a speed of 15 pieces per minute. This shrink packing machine is ideal for industries such as beverages, pharmaceuticals, cosmetics, food, and household goods, offering consistent, durable, and cost-effective packaging.

Key Features of the MIC-20B Automatic Shrink Packing Machine

The MIC-20B shrink packaging machine is designed with cutting-edge automation to enhance packaging efficiency while maintaining superior shrink-wrapping quality. Its key features include:

1. Fully Automatic Operation – Reduces manual labor, increases efficiency, and improves overall packaging speed.
2. High-Speed Performance – Wraps up to 15 pieces per minute, making it ideal for medium-to-large-scale production.
3. Uniform and Secure Wrapping – Provides tight, professional shrink wrapping that protects products from dust, moisture, and external damage.
4. Energy-Efficient Heating System – Optimized to reduce power consumption while maintaining consistent wrapping quality.
5. Versatile Packaging Capabilities – Suitable for single product shrink wrapping and bulk packaging applications.
6. Durable and Compact Design – Built with high-quality materials for long-lasting performance while maintaining a space-efficient footprint.

Advantages of the MIC-20B Shrink Packaging Machine

1. Improved Product Protection

This shrink packaging machine forms a secure, tamper-resistant seal, ensuring products remain free from contamination and damage.

2. Cost-Effective and Efficient

By using shrink film, businesses can significantly lower packaging costs while maintaining high-quality protection and presentation.

3. Increased Productivity

The automatic shrink packing machine enhances production efficiency, allowing businesses to process more products in less time.

4. Professional Packaging Aesthetics

A tight and clear shrink wrap improves product presentation and market appeal, making it ideal for retail-ready packaging.

5. Versatile Industry Applications

The MIC-20B shrink packing machine is perfect for bottled beverages, pharmaceutical products, cosmetics, food items, and electronic goods.

6. Easy to Operate and Maintain

Designed with user-friendly controls, this automatic shrink packing machine requires minimal training and maintenance.

Parameter

Dimension for the whole unit	L11840mm*W1100mm*H2100mm
Thermal shrinkage passage dimension	L2400mm*W650mm*H450mm
Max package dimension	L600mm*W400mm*H350mm
Packaging speed	15 Pcs/minute
Transfer belt width	550mm
Sealing and cutting time/temperature	0.5-1.5s 180°C-260°C
Operating power supply/power	380V 30kw
Operating air pressure	0.6-0.8Mpa
Air Consumption	0.6m ³ /minute
