

SUNHAN

SH-AFC9H Automatic Peristaltic Pump Skin Serum Liquid Vial Filling Rubber Stoppering Sealing Machine With Laminar Flow Hood

Main Feature

- ▶ Machine can finish bottle sorting, liquid filling and partial stoppering functions in one machine. (Can be used for fully stoppering)
- ▶ Cam system controlled operation, enabling reliable performance at 40-60BPM.
- ▶ Filling is controlled by peristaltic pump, liquid will only pass through the tube, ensuring contamination-free and clean production.
- ▶ Equipped with a laminar flow hood & dust cover to ensure product quality.

Parameter

- Machine Model: SH-AFC9H
- Voltage: AC 110/220V 50-60Hz
- Power: <3000W/h
- Working Speed: About 40-60 bottles/min (depending on filling range)
- Filling Pump: Peristaltic pump
- Filling Nozzle Quantity: 2
- Filling Range: Customizable
- Filling Accuracy: $\pm 3\%$
- Package Size: About 610*1900*1270mm(Laminar Flow Hood)
- About 2110*1320*2110mm(Main Machine)
- Package Weight: About 181kg(Laminar Flow Hood)+908kg(Main Machine)
