

SED-120P-H Easy-Break Blister Packaging Machine For Honey Pack

SED-120P-H Easy-Break Blister Packaging Machine is used for forming, filling and sealing packaging of liquid and paste materials. The finished product can be broken open with only one hand, and the material can be squeezed out.

This machine completes forming, film pre-cutting, material filling, sealing, die cutting and finished product output in an automatic process. It is suitable for sauce, perfume, cosmetic, oral liquid, honey, etc., which is convenient to carry and use.

Features

1. It is controlled with PLC, and the speed is regulated with servo motor.
2. Film feeding, plastic forming, filling, sealing, batch number printing, impressing, and die cutting can be completed automatically by program.
3. Simple and clear operation with HMI.
4. Filling nozzle with no dripping, foaming or spilling.
5. Liquid contact part adopts high quality stainless steel, GMP-compliant.
6. Main pneumatic components and electrics adopt imported brand.
7. There are two types of electronic peristaltic pump automatic control system and mechanical filling, with high filling accuracy.

Technical Parameters

Model	SED-120P-H
Max. Forming Depth	20mm
Cutting Frequency	0-22 times
Packaging Material	PVC/PE
Packaging Size	(0.2-0.4)×120mm
Filling Volume	1-30ml
Installed Power	6.5KW
Voltage	380V 50HZ
Weight	1100kg
Overall Dimension (L×W×H)	3750×850×1400mm
