

DS-240S Horizontal Doypack Filling Packing Machine

This series are designed for big volume doypack with functions of making hanging hole, special shape, zipper or spout

Servo Advance System:

1. easy computerized specification change
2. stable pouch advance with less deviation
3. big torque moment of pouch advance, suitable for big volume

Zipper Function:

1. independent zipper unwind device
2. stable zipper tensile force control
3. even zipper seal

Servo WB Structure:

1. accurate positioning with stable operation
2. good rigidity, big load bearing
3. Long WB moving distance

Spout Function:

1. even spout seal with good appearance
2. high spout seal strength, no leakage

Technical Parameters

Model		DS-240S
Pouch Size	mm	min.100*120 max.240*320
Packing Capacity	ppm	30-60
Filing Capacity	ml	1500
Power	kw	10
Air Consumption	NL/min	300
Machine Dimension	mm	L6900*W1250*H1550
Weight	kg	2600
