

H P2000L Full-Automatic Liquid Packaging Machine

This machine is widely used to pack liquid for low and high viscosity such as pure water, milk Juice, beverages, soy sauce, vinegar and wine. It can automatically sterilize the film with violet ray, form the bag, print the code precisely, fill the product and seal&cut at one time. Model JEV-1000L-1 and JEV-1000L-II used single lay PE film and laminated film and the JEV-1000L-III, JEV-1000L-B used printed laminated film such as PET/PE, OPP/PE, to present more attractive packing.

Technical parameters

Model	JEV-2000L
Output	2100 BAGS/HOUR
Capacity	100-500ML
Power	1.2kw 220VAC/380VAC
Size	970 x870 x2200mm
Weight	370kg
Film width	240/320mm
