

SD-YYs-170 Eye Drop Filling Sealing Machine

The SD-YYs-170 filling sealing machine (filler sealer) is suitable for the high output production of eye drop. It can work with high speed but also stably and is of high eligibility rate. This equipment can be also used to produce iodine, 3essential balm and tincture.

Characteristics:

1. Rinsing inside tuck and rinsing outside lid have specialized mould and structure respectively, that ensure the quality.
2. The axis-leaving transporting makes its gentle sound and long longevity.
3. Its inside tucks and outside lid can adopt the style of both the orbits and the single orbit.
4. Can filling with eliminating froth and diving style and without spattering.
5. PLC control, simple and easy to operate.

Technical Parameters:

Filling Capacity	5-50ml
Power	0.38KW
Producing Capacity	30-120 bottles/minute
Filling Precision	≤0.5%
Eligibility rate of rinsing the inside tuck and the outside tuck	≥99%
