

JTJ-3 Semi Automatic Capsule Filling Machine

After JTJ-2's accumulated production experiences in manufacturing several thousand sets of JTJ-3 Vertical Closing Filling machine, JTJ-2 developed the latest JTJ-3 can operates more efficiently and smoothly without damaging the capsules. This machine filled on powder and can also filled on granules and pellets into the capsules.

Feature:

1. All outer casting of the machine including hopper, machine table, etc. and are all made of stainless steel meeting G.M.P. requirements.
2. Infinitely variable speed of filling tablet with independent power and fix point filling that result in accurate dosage.
3. No painting finish on the machine surface thus it can avoid that the paint strips off and mix into the powder, then fill into the capsules.
4. The horizontal closing system is more efficient, safety, and smoothly closes without damaging the capsules.
5. A special design allows for changing mold for different size capsules within 15 minutes easily, simply, and precisely.
6. Simple structure and free of malfunction, easy to maintain and clean.
7. Simple operation, only one operator required, and operating training can do in 10 minutes.
8. Different filling weights can be adjusted without change parts.

Technical Data:

Model	JTJ-3
Productivity	6000-40000 caps/h
Capsule to be use	00#,0#,1#,2#,3#,4#
Type of Filling	Powder, Granule
Totak Power	3.4Kw
Net Weight	1000Kg
Dimension	1350X780X1650mm
Pump	Vacuum Pump 1set
Accessories	Air Compressor 1set
