

Liquid Filling Production Line STJ100

STJ100 liquid filling line can be used as the supporting part of the high speed bottle unscramble, high speed filling machine, high speed lifting-capping machine, and high speed labeling machine. It also can be used alone, which adapted to medical, health, food, chemical, and pesticide industries. It can arrange bottles, fill, cap, screw and label automatically, the entire process meet the GMP requirements.

Technical Parameters:

Applicable Specification	20-500ml
Yield Capacity	100-200 bottles/min
Filling accuracy	99%
Votlage	380V,50HZ
Power	5KW
Capping rate	99%
Weight	3500kg
Dimension	8000*1300*1700mm
