

Automatic Liquid Filling Machine with 8 Filling Nozzles **MTFM-1000**

Application:

The machine is suitable for filling liquid products, widely used in food, chemical, beverages, and similar

Spec and Feature:

- 8 filling nozzles
- Diving filling method is available
- High filling speed and filling precision, no bubble, stable
- Filling volume is adjustable in certain filling volume scope
- Single nozzle is micro adjustable
- International branded electronic parts applied, good performance
- Compact models, operation stability, simple operation, easy cleaning
- PLC, Touch screen human-computer interface with simple operation

Technical Parameters:

Production capacity	60-6600 BPH (take 1L, 6 nozzles as standard)
Product applicable	10-100ml, 100-1000ml, 500-3000ml, 1000-3000ml, 1000-5000ml plastic or glass bottle
Filling method	Gravity Filling Method, Drive Filling Method
Filling precision error	±1% (exclude product and label error)
Power	380V 50Hz, 2.0KW
Machine size	2500*900*1650mm ³
