

Semi Capsule Filler CGN-208D

Packry's Semi-auto Capsule Filling Machine (CGN208-D) is widely used by small and medium pharmaceutical companies, such as hospitals and small laboratories. The machine adapts programmable control system, colorful touch screen, automatic capsule counting. The machine is automated by the section including capsule positioning, separating, filling, locking.

By using PLC control system, the machine is easy to operate, and the main part is made of stainless steel, which make the machine meet GMP requirement.

Semi -automatics filling medicament machine for capsule is suitable for filling medical met into capsule of made in China or import capsule the electric and air controls reused for this machine by which automatic counter capsules into position capsules separated capsules efficiency reduces labor intensity and up to demands of pharmaceutical and healthy. Equipped with complete safety and protection devices, operation is steady and credible

Features:

- Semi Automatic Capsule Filling Machine is a new type of medicine filling machine with novel structure and attractive appearance.
- Under both electrical and pneumatic control and equipped with and automatic electronic counter and computer-controlled speed-adjusting device, the machine can accomplish the positioning, separation and locking etc. of capsules.
- In place of manual capsule-filling, it can reduce labor intensity and raise productivity. Its filling amounts are accurate and up to sanitary standards for pharmaceuticals.
- The machine consists of capsule-feeding, U-turning and separating mechanism, material medicine-filling mechanism, locking device, electronic speed varying and adjusting mechanism, electrical and pneumatic control system protection device as well as accessories such as vacuum pump and air pump.
- China machine-made capsules or the imported are applicable to this machine, with which the finished product qualification rate can be above 97%.

Specification:

Model	CGN-208D
Productivity	1-25,000 capsules/h
Applicable capsules	#000/00/0/1/2/3/4/5
Filled medicine type	Not adhesive or wet powders, and small granules
Total power	4.0KW
Air pressure	0.03m ³ /min, 0.7MPa
Vacuum pump	Evacuating rate, 40m ³ /h
Dimension(L*W*H)	1500*780*1800mm
Weight	380KG
