

## *Automatic Carton Folding and Sealing Machine*

This carton sealing machine features on the basis of the latest development from home and abroad all kinds of carton sealing machine. Wide scope of application.

### **Features:**

1. Using international advanced technology and imported components, electrical components and pneumatic components.
2. Manually adjust the size of the carton, suitable for carton sealing of the same size at the same time.
3. Easy to operate, easy to use, easy to adjust, fast sealing, high efficiency.
4. Equipped with blade protection device to avoid accidental puncture during operation.
5. Lightweight, precise and durable performance, no vibration during operation, stable operation for long time, high efficiency.
6. Can be used as a stand-alone machine or in combination with automatic packaging lines.
7. Applicable to product packaging in various industries such as household appliances, textiles, food, daily necessities, pharmaceuticals, light industry, chemical industry, and carton sealing.

### **Technical Parameters:**

Power Supply	220V/380V 50/60HZ 0.6KW
Carton Size	L200-600*W150-500*H150-500mm
Speed	15-20carton /Min (According To The Carton Size)
Adhesive Tape Width	48mm/60mm/72mm
Air Source	0.6-0.7Mpa
Dimension	1770* 850* 1520mm
