

## *Semi Auto Round Bottle Labeling Machine CX-BYT*

### **Product Characteristics:**

1. Wide application, adapt to the dimension of 10-100mm round bottle labeling.
2. High accuracy, and the error of label joining part is no more than 0.5mm.
3. Adopt extrusion device to feeding, just need to put work-pieces, the machine can automatically finish labeling.
4. Use chuck type to adjust, different work-piece can cut over easily.
5. Use the synchronous belt, the stability of the mechanism is greatly improved.
6. Desktop design, make the structure simple, figure small and function strong.
7. Anode corundum alloy shelf and the deluxe computer white electricity box make the figure beautiful and generous.
8. Advanced magic eyes, make the sensitivity high for the object and label.

### **The scope of application:**

1. Round bottles, cans, cylinders or tubes.
2. PET bottles, plastic bottles, glass bottles or metal bottles.

It's widely used in industries, such as cosmetics, beverage, food, medical, etc. and greatly improve the production efficiency

**Technical Parameters:**

Voltage	AC220V, 50/60HZ
Power	0.8KW
Labeling Speed	25-50 pcs/min
Labeling Accuracy	±1mm
Height Label Object/diameter	30-200mm /30-90mm
Label Size	15-150mm(H),25-300mm(L)
Roll Size	Φ76 mm, Φ250mm
Machine Size/Weight	810(L)×4900(W)×580(H)mm /42kg
