

Ointment Tube Filling and Sealing Machine

This ointment tube filling and sealing machine is widely used for different hoses (various plastic pipes with different diameters of $\Phi 16$ - $\Phi 35$, aluminum-plastic composite pipes), as well as filling materials with viscosity and characteristics (from water to high viscosity paste). Installation, fully meets the requirements of different levels of GMP production environment.

Advantages:

1. Tube feeding conducted pneumatically, accurately and reliably.
2. The ointment tube filling and sealing machine is stepless frequency conversion timing system. The filling speed can be set easily.
3. Stainless steel machine body, strong and beautiful looks.
4. Adjustment parts external in position, position digital display, convenient and accurate adjust (suitable for variety products producing).
5. The ointment tube filling and sealing machine is designed to connect the automatic material feeding system with the emulsifying machine or mixing machine conveniently Overload Protection Provided

Technical Parameter:

Power Supply	380(220)V/50Hz
Air supply	4-6Mpa
Air Consumption	0.6-0.8Mpa
Filling Volume	50-250ml
Volume Precision	$\leq \pm 2\%$
Productivity	15-38pcs/min
Tube Diameter	16-35mm
Dimension (L*W*H)	1200*1000*1700mm
Weight	300kg
