HYRS-S Automatic Rotary Multi Heads Capping Machine

Automatic rotary type grasping-cap capping machine automatic is integrated bottle collecting, cap arranging, cap putting on, cap rotary and bottle exiting in one machine. It uses catching cap positioning rotary cap, whole machine is rotary structure. In the process of rotary cap without injury bottle and cap phenomenon, high efficiency, high qualified rate, stable operation, wide application range. The machine is adaptable for various kinds of outer cap automatic revolve to close for regular glass or plastic bottle, the capping device grasping various caps transmitted by scraping plate, complete outer cap revolve to close in the bottle rotary process. The machine adopts PLC control, touch human-machine interface, convenient and intuitive operation.

It is widely used in pharmaceutical, chemical, food, beverage, oil and pesticides industries.

Main Technical Data

- Capping head: 4, 6, 8
- Maximum capacity: 4500, 6000, 8000B/H
- Suitable bottle diameter: $\phi 40-90\text{mm}$
- Suitable bottle height: 80-250 mm
- Applicable cap diameter: $\phi 15-\phi 55\text{ mm}$
- Applicable cap height: 15-35mm
- Percent of pass: $\geq 99.8\%$
- Total Power: 4.5Kw
- Power supply: 220V, 50Hz
- Air supply: 0.6-0.8Mpa
- Dimension: 3500x1380x2100mm
- Weight: 1500 kg
