

Flat Bottle Labeling Machine YSY-662

Flat bottle sticker labeling machine is a perfect labeling machine for the bottles of flat surface, irregular surface, concave surface and arc surface. What's more, it can label round bottles, conical bottles, angular multifaceted bottles and other different styles of bottle objects. It is a modern mechatronics product with excellent and reliable performance.

Product Features

1. Fully automated labeling, rapid increase in production capacity.
2. Convenient and intuitive operation, ergonomic touch screen.
3. Excellent labeling quality, accurate labeling and anti-offset.
4. Intelligent control reduces labor costs.
5. The speed is adjustable and can be adjusted freely as required.
6. High stability, precise and stable control.
7. Optional functions, customized according to requirements.
8. It adopts computer optical fiber control and synchronous tracking. The label output is controlled by a mutual inductance stepper motor to ensure that the label output speed is synchronized with the reel speed.
9. Cleanliness and sanitation, no mold, beautiful and firm after labeling. Not fall off by itself, and high production efficiency.

Product Parameters

Model	YSY-662
Labeling Speed	1--50m/min (80-200b/min)
Labeling Precision	±1mm
Max Width of Label	190mm
Product Labeling Size	Φ30-100mm
Paper Roller Inner Diameter	Φ76.2mm
Paper Roller Outer Diameter	MaxΦ330mm
Over Dimension(mm)	3048*1200*1500mm
Total Power	3kw
N.W (kg)	320kg
Voltage	220V single phase/380V three phases /50HZ
