

LC-118 Automatic Oral Liquid Filling Machine

The machine is widely used in lotion, care solution, oral liquid, disinfectant, eye drops, nutrient solution, wine, pesticide, medicine, perfume, edible oil, lubricants, chemical and special industry liquid filling.

The main performance characteristics:

1. PLC control, stepless frequency adjustment.
2. Unwinding, plastic molding, filling, batch number, cut tail, punching, cutting and other seven stations by the program automatically.
3. Man-machine interface device, simple operation.
4. Filling head does not drip, can not afford to bubble, not overflow.
5. Contact with the liquid all parts of the use of high-quality stainless steel, in line meet GMP standards.
6. The main pneumatic components, electrical appliances are all imported.
7. Two filling type, electronic peristaltic pump control filling system and mechanical filling, high filling accuracy.

Technical parameters:

Maximum forming depth	12mm
Speed	0-25Times / min
Number of filling heads	6 filling heads are filled at the same time
Packaging Materials	PVC/PE (0.2-0.4)×120mm
Filling capacity	1-50ml/bottle
Power	6.0kw
Power supply	220V 3P/60Hz (380V 3P/50Hz)
Weight (kg)	850kg
Dimensions (L×W×H)	2300×850×1450 (mm)
