

Filling Machine RGZ-8D

Specifications

1. Eight sets of rotary lobe pump(liquid contact parts in SUS316 or Teflon)
2. Eight sets of stainless steel SUS 304 filling nozzle
3. Shut off filling nozzle with pneumatic valve to prevent dripping
4. Each filling pump driven by a variable speed Servo motor individually
5. Dipping type filling nozzle, no spilling of liquid onto clean bottles and conveyor
6. Filling nozzle holding device and uplift assembly with a huge solenoid valve
7. Stainless steel drip tray to keep liquid from spilling onto the clean bottles
8. Empty bottles feeding index gate and filled bottles relaxing index gate
9. Pneumatic control system for index gates
10. Photocell sensors (Japan OPOTEX brand)

Features

1. Capacity: 32-40BPM (bottle per minute) based on 1 liter bottle
2. Application: Edible Oil, Detergent
3. Filling Volume: 25-1500ml
4. Bottle Material: Glass/HDPE/LDPE/PET/Metal
5. Bottle Shape: Round/Cylindrical/Falt/Square/Oval/Rectangular
6. Bottle Diameter: Available from 50 to 100mm
7. Bottle Height: Available from 100 to 300mm
8. Neck Finish: Bigger than 28mm
