

Automatic Liquid Filling & Capping Machine – CE-4F2C/YL-A

This machine is the new machine which in these years we design and make it. can set number of steps peristaltic pumps with microcomputer to perform metering filling (special occasions with ceramic pump).

It has the functions: automatic filling, automatic plugging and capping. The machine is equipped with special internally unique mechanical hand. These can ensure the plug and the out cover to enter the bottle, so that it achieves fully automatic.

The machine fully meets with new GMP requirements.

- Be settled by microcomputer, high precision, easy operate.
- Filling system has sucked back, no dropping or leakage.
- Use the mechanical hand to plug and press the cover.
- No bottle, no filling, no plugging and no capping.
