

Automatic Round Bottle Labeling Machine

Automatic round bottle labeling machine is the use of self-adhesive roll labeling paper, labeling using roll-on paste, the preparation of automatic bottle feeding and bottle collection device, a time to complete the bottle release, labeling and bottle collection procedures, can also be equipped with printing machine synchronous completion of label printing, the machine using computer optical fiber control, synchronous tracking, bidding by the mutual inductive stepper motor control, to ensure that the speed of the label and the speed of the bottle synchronous automatic packaging machinery. Automatic round bottle labeling machine is a modern product with excellent and reliable working performance. The automatic round bottle labeling machine has the advantages of clean hygiene, no mildew, beautiful and firm after labeling, will not fall off on its own, and high production efficiency. Suitable for tall round bottles.

Technical Parameters:

- Type: automatic round bottle labeling machine
- Labeling speed: 30-60(bottles/min).
- Quilt size: 10-180 (mm).
- Labeling accuracy: 0.5 (mm)
- Label maximum width: 200 (mm).
- Applicable product size: length: 15mm~ 300mm Width:15mm~ 150mm
- Degree of automation: Fully automatic
- Supply voltage: AC 220/50 110/60
- Power: 1000W
- Net weight: 300kg
