

Automatic Capsule Filling Machine NJP-2000

Touching-Screen, PLC program control panel with LCD.

The Automatic Capsule Filling Machine makes the capsule pass rate more than 99%.

Removable powder hopper for cleaning and easy auger adjustment easy to change fills weights.

Easy speed selection and closed capsule length adjustment.

The Automatic Capsule Filling Machine complies with CE and international standards for electrical control systems.

Features

- The Automatic Capsule Filling Machine allows quick and accurate part replacement and easy removal of the turntable and ring bracket assembly.
- The Automatic Capsule Filling Machine has a fully enclosed dosing station and a rotary table for the integration of the entire capsule filling plant.
- The large cam mechanism keeps the mold rotary table in balance with the entire equipment, ensuring the highest precision and accuracy of the Automatic Capsule Filling Machine.

Technical Parameter:

Model	NJP-2000
Output	2000 capsules/min
Filling Product	Powder、Pellet
No.of segment bores	18
Power	380V 50Hz 6.82kw 3P
Capsule Size	00#-4#capsule
Filling error	±3%—±4%
Noise	≤78dB (A)
Making rate	Empty capsule 99.9% Full capsule over99.5
Machine Dimensions	1200*1050*2100mm
Machine Weight	1300kg
