

## GS 10-1N

*Syringes filling and closing machine*

Function and features:

1. To load syringe tubes automatically and continuously.
2. Watered-based solution and viscous liquid can be filled with filling space, no bubbles.
3. In a vacuum stoppering closed for the end of filling syringe.
4. Rubber plug in close contact with the outlet of the syringe without air bubbles.
5. Turntable structure, simple operation, automatic continuous production.

Item code	GS 10-1N
Name	Syringes filling and closing machine
Syringe volume (ml)	0.5-100
Filling volume (ml)	0-100
Filling accuracy	≤±0.3%
Speed (Pcs/minute)	30-45
Speed (Pcs/hour)	1800-2700
Total power(Kw)	2.1
Compressed air	0.55-0.75 Mpa 20L/S
Overall dimension (L*W*H)	1500*850*1800
Weight of basic machine (kg)	600
