

Single Side Automatic Labeling Machine

Features:

Single side automatic labeling machine suitable for square bottles or flat bottle shape was Hugh's side labeling can be installed independent of the plastic body, specifically for the cosmetics industry and other automatic labeling of irregularly shaped objects; can be installed roll-fed devices. While achieving automatic labeling round bottles.

Plastic with tilt able design, header eight-dimensional space to adjust, any product can be adjusted within a few minutes using the name of the host plant is completed servo motor, true closed-loop control, avoiding the ordinary stepping motor "blind walk" phenomenon, high-precision subdivision, built-in absolute encoder, all this is designed to improve accuracy.

Calibrating the label through the blade without power sponge roller compaction, power sponge roller extrusion and other procedures to complete a label no bubbles, especially for transparent stickers frosted bottle label.

Machine Specification:

Product name	Sided + labeling machine
Labeling speed	40 m / min (80-200 pieces / min)
Labeling accuracy	±1mm
The maximum width of the label	190mm (Can be designed according to customer requirements)
Be affixed Size	Thickness: ≥30mm height: ≤500mm
Applicable roll inner diameter	Φ76.2 mm
Applicable outside diameter roll	maximum Φ330mm
Machine size	L3048*W1200*H1500 (mm)
Weight	280 KG
The use of electricity	380/220V 50Hz 2300W
