

## Liquid Filling Machine ZGP-H

Zhongtai gravity filling machine is suitable for automatic bottling of consistent viscosity liquids, such as air freshener, glass cleaner, Dettol disinfectant liquid, etc. The gravity filler uses time-based control and servo-driven piston pump to fill liquid products. Multiple bottles with different volumes can be simultaneously filled by one machine, ensuring fast speed and high-precision filling process. The filling speed is adjustable according to your specific needs.

### Features

- All parts from the liquid/paste filling machine that contact liquid are made of stainless steel.
- Adopting servo motor to ensure high-precision filling, and various bottle capacities can be adjusted easily, such as 200ml, 500ml, 1000ml, and can be placed in same liquid filling machine.
- When there is no bottle, filling and capping will not be carried out.
- The capper can be easily changed to fit different caps.

### Technical Parameters:

Model No.	ZGP-H
Packaging Container Lifting Structure	Pneumatic Lifting
Packaging	Bottle
Machine Material	SUS304
Use	for Foamy Liquid
Production Capacity	50 sets/Month
Structure	Linear
Packaging Material	Plastic
Contact Material	SUS 316
Specification	2440*1150*2300mm
