

## Perfume Filling And Capping Machine MTCCFC-100

### Application

- The filling capping machine is mainly used for plastic perfume spray bottle and square shape credit card bottles
- Suitable for small volume 5-50 ml liquid automatic filling and capping, like hand sanitizer and perfume and so on

### Spec and Feature

- The whole machine is designed especially for 10-50ml liquid filling, capping
- The line speed is 20-30 bottles per minute
- Famous branded electrical parts guarantee the line working stable and a longer working life
- Adopts peristaltic pump, high filling precision. No bottle, no fill, no drop, no leak
- Touch screen, easy operate and adjust human interface. English operation interface
- Suitable for single, mass production, but no more than 3 kinds
- The machines have emergency stop Button and automatic interrupt device for safe operation
- Labors need: 1-2 workers

*Note: We can make fully automatic machine with higher speed for you as well*

### Parameter:

Speed	1500-2000bph (customizable)
Filling accuracy	>99%
Filling volume	10-50ml(customizable)
Filling method	servo motor + peristaltic pump
Power supply	220V 50hz 2kw
Bottles applicable	cartridge,credit card square flat bottle and similar
Caps applicable	press caps
Application	Liquid
Feature	PLC, touch screen, tank, level meter
