

## *Honey Stick Packing Filling Machine JD-BY100*

This stick machine can automatic measuring, making bag, filling, sealing ,cutting off, batching number and output counting, suitable for viscous material such as honey, chocolate paste, etc.

1. PLC, self-diagnosis function, easy to operate.
2. According to film thickness (support 70-140mic), set temperature on the panel directly.
3. Adjust the stick length on control system directly, high sensitive trace sensor.
4. Heating and mixing system, heating temperature up to 100°C, more suitable for viscous material.
5. Whole machine material is stainless steel 304,in line with international food and medicine industry.
6. Driving type is Electric+pneumatic, more beautiful sealing appearance.

### **Technical Parameters:**

**Model:** JD-BY100

**Capacity (bags/min):**30-60

**Range of measurement:**10-100ml/0.35oz-3.5oz

**Bag type:** center sealing/stick

**Packaging Material:** 70-110mic laminated film such as PE + paper +pet/ PE + PET/ AL Foil / PE + Nylon + PET / Filter paper etc.

**Voltage power:** 380v/50Hz 220V/50-60Hz 1.5KW

**Net Weight:** 220kg/485lb

**Overall Dimension (L\*W\*H):**712\*680\*1850mm/28"\*26.77"\*72.83"

**Driven Type:** Pneumatic+electric or electric

**Air Consumption:** 0.4m<sup>3</sup>/min 0.6-0.8mpa
