Oil Filling Sealing Machine YSDY-F

Product introduction:

1. High quality oil filling machine with conveyor belt has double heads, high or low speed can be set freely, it is suitable for filling various kinds of viscous, non-viscous, corrosive and non-corrosive liquid.
2. The filling capacity of the oil filling machine with conveyor belt, usually can reach above 8-10 bottles per minute.
3. The oil filling machine with conveyor belt has quantitative cup structure, driven by the oil-cylinder piston's repeated movement which is driven by air-cylinder, quantitative filling the oil into bottles, high accuracy, speed filling, double speed filling, slow down after fast, more accurately.
4. The oil filling machine with conveyor belt uses the compressed air as the power to work without any other power supply and can work at an explosive or combustible circumstance.
5. This oil filling machine with conveyor belt can achieve filling in the same time, which can raise working efficiency.

Technical parameter:

Model	YSDY-F
Filling capacity	1-5L 0.2-1L
Filling speed	100-300 times/h
Voltage	220/380V
Filling accuracy	less than $\pm 1\%$
Air pressure	0.5-0.7Mpa
Size	600×598×1300mm
N.T.	70 kg
