

Low-Level Palletizer

According to a certain order, palletize stacks the packed products (in box, bag, bucket) to the corresponding empty pallets through a series of mechanical actions so as to facilitate handling and transporting batches of products to improve production efficiency. Meanwhile it can use stack layer pad to improve the stability of each stack layer. Various forms designed to meet different palletizing requirements.

Technical Parameter:

Stack Speed	40 cartons per minute, 4-5 layers per min
Height of Carton case	>100mm
Max. carrying capacity /layer	150Kg
Max. carrying capacity /pallet	Max 1500kG
Max. stack height	1800mm
Installation Power	15.3KW
Air Pressure	≥ 0.6 MPa
Power	380V.50Hz, three-phase four-wire
Consumption of the Air	600L/Min
Size of the Pallet	According to customer requirement
