

Automatic Liquid Packing Machine DXDY-BN Series

Automatic filling and closing machine for liquid products DXDY-BN series uses content management dose using the solenoid valve depending on the viscosity of the product. Electronic adjustment of the package length. As a heat-sealable packaging material used composite materials, such as paper / PE, Cellophane / PE, aluminum foil / PE, BOPP / PE, Nylon / PE, etc.

Application:

Automatic filling and closing machine series DXDY-BN is widely used in food, chemical, medical and other industries for packaging various liquid products in the soft bags.
