

Yogurt Cups Rotary Filling & Sealing Machine

The Yogurt Cups Rotary Filling & Sealing Machine is really suitable for filling and sealing of milk yogurt, fruit milk, juice, oil and other liquids. As a matter of fact, our Yogurt Cups Rotary Filling & Sealing Machine adopts rotary design, with convenient and quick, flexible and changeable function, which is suitable for filling and sealing of containers with different shapes. Pneumatic components and main electrical components are all imported components, thus to ensure high and reliable performance.

Product Description

The Yogurt Cups Rotary Filling & Sealing Machine is equipped with advanced process, which has the advantage of simple operation, stable performance and easy maintenance. It can be used either as a stand-alone machine or connected to the production line. Due to the advanced combining filling and sealing, it realizes the function to ensure that the structure is compact, the operation is simple and convenient, and the production efficiency is high. There are various kinds of model options, thus providing more choices to meet need.

Technical parameter:

Driving cavities	1	2	4
Produce capacity	500~600 cups per hour	1000~1200 cups per hour	1800~2000 cups per hour
Filling volume range	200~500 ml		
Sealing reject ratio	less than 1%		
Total power	1~2.0kw		
Electricity	50/60Hz 380V 3 phases		
Outer size	750mm×750mm×1500mm (for referring)		
Total weigh	About 280kg (for referring)
