

## Pure Water Sachet Filling and Sealing Machine CXGF24-24-8

The capacity of pure water sachet filling and sealing machine is 12000BPH. It is used for PET bottled mineral water and purified water production. The equipment is an all-in-one machine for rinsing, filling and capping. Fast filling speed, stable liquid level control, no dripping phenomenon are our filling machine's advantage.

### Technical parameters:

Model:	CXGF24-24-8
Capacity:	12000BPH at 500ml
Bottle height:	120-310 mm
Bottle diameter:	50-105 mm
Bottle mouth diameter:	26-40 mm
Bottle type:	PET bottle
Cap type:	HDPE cap
Locate mode	Liquid level
Rinsing heads:	24
Rinsing time:	over 2 seconds
Filling heads:	24
Filling temperature:	normal temperature
Filling pressure:	0.2-0.4 Mpa
Flow velocity of the valve:	120-150 ml/s

Filling valve:	SUS304
Product reservoir tank:	SUS304
Capping heads:	8
Capping torque:	0.6-2.8 Nm (adjustable)
Motor power:	4kW
Power supply:	380V, 50HZ (Customizable)
Consumption of compressed air:	1 m <sup>3</sup> /min (0.6MPa/H)
Consumption of aseptic water:	4 m <sup>3</sup> /h (0.2-0.25Mpa)
Dimension:	2750x2100x2300MM
Weight:	4000 Kg
