

LQ-CC Coffee Capsule Filling and Sealing Machine

The coffee capsule filling machines are specifically designed for the needs of specialty coffee packing to provide more possibilities to ensure the freshness and shelf life of coffee capsules. The compact design of these coffee capsule filling machine allows for maximum space usage whilst saving labor cost.

Technical Parameter

Machine parts	All the product contact parts are food grade stainless steel AISI 304.
Certification	CE, SGS, ISO 9001, FDA, CSA, UL
Product	Fresh ground coffee; instant coffee; tea products; other food powder
Capacity	45-50 Pieces /per minute
Coffee feeding	Auger filler driven by servo motor
Filling accuracy	±0.15g
Filling range	0-20 g
Sealing	Pre-cut lid sealing
Hopper capacity	5L, around 3 kg powder
Power	220V, 50Hz, 1Ph, 1.5kw
Compressed air consumption	≥300 L/minute
Compressed air supply	Dry compressed air, ≥6 Bar
Nitrogen consumption	≥200 L/minute
Weight	800Kg
Dimension	1900 mm(L)*1118 mm(W)*2524 mm(H)
Note: Compressed air and nitrogen is provided by customer.
