Automatic Juice Filling Machine

This juice factory is made with high-quality components and cutting-edge technology. Our supplied juice plant is also well-liked for its efficiency and dependability. The offered juice plant is available in a variety of specifications in the market.

Feature:

- **Sturdy look:** The look is beautiful, and the design is compact and fair.
- **Control Mechanism:** Volumetric Mechanical base Piston system with different volume changes.
- **Filling Nozzle with Filling Blocker:** The filling nozzle now has a filling blocker. This machine can perform diving filling based on the qualities of the materials. (you have the option of selecting this function)
- **Improvements in performance:** Using an internationally recognized brand to assure exceptional quality, stability, and precision.
- **Machine Elements:** The parts that come into touch with the material are made of high-grade stainless steel (SS 304), which is non-poisonous. (If required, SS316 could be used.)
- **Scalability:** We may perform bespoke configurations to meet the needs of our customers. (airtightness, heating, sterilization, and so on)
- **Filling Detection:** No bottle, no filling; if there aren't enough bottles, it won't fill them.
- **Maintenance Ease:** Fully compliant with GMP criteria, easy to disassemble and clean.
- **Eco-friendly Configuration:** Equipped with an environmentally friendly frame, allowing for a more sanitary and cleaner operating environment as well as more precise filling measurement.
- **Simple Switchover:** There is no need to alter any components, and it is simple to change the bottle types by adjusting the knobs.

Technical Specification:

- Filling Range :- 50 ml to 1000 ml
- Output :- 1500 to 2400 per hour
- The Direction of Movement :- Left to Right
- Number Of Head / Syringe :- 4 Nos.
- Main Machine :- 1 HP / 415 V / 50 HZ
- Conveyor :- 0.5 HP / 415 V / 50 HZ
- Power Supply:- Single Phase
