

TTF-700A Plastic Plates Making Machine

Fully automatic plastic tray making machine can also be called plastic tray thermoforming machine. It is a device of Litai Machinery for producing plastic trays.

The machine is also equipped with a chiller, an air compressor, and an air storage tank. These auxiliary equipment make the machine from The integrated production of feeding, heating, forming, cutting, stacking and waste recycling, the equipment can be used for PP, PS, PLA, PET, PVC, HIPS and other plastic sheets. , exported to the world.

Technical Parameters:

Model	TTF-700AF	TTF-700A
Forming Area	700mm x 600 mm	
Forming Depth (Max.)	135mm	
Sheet thickness	0.2-2.0mm	
Forming Speed (Max.)	30times/min	
Air pressure	0.6-0.8mpa	
Air consumption	3.6 m ³ /min	
Water consumption	0.7 m ³ /h	
Sheet width (Max.)	730mm	
Suitable Sheet	PP, PS, HIPS, PET, PVC, PLA etc.	
Power supply	AC 380V, 50Hz, Three-phase, Four-wire	
Used power	105Kw	95Kw
Rated power	210Kw	190kw
Heating power	118Kw	
Procedure	Forming-punching-cutting-stacking	Forming-cutting-stacking
Dimension	L13000*W4700*H2750mm	L11500*W4700*H2750mm
Weight	About 25.0T	About 19.0T
