Industrial Sugar Cone Baking Machine GG25

The GG-25 automatic sugar cone baking machine is used for rolling sugar cones. This machine has high automation, is ideal equipment for making rolled sugar cones. This machine is used to offer ice cream cones for the next process, to be filled with ice cream.

How to operate this machine?

First, spread batter on the baking plates to prepare the wafer sheet, then the rolling device will roll them into rolled sugar cones. If you want large production capacity, an automatic ice cream cone production line is your good choice. Good performances of sugar cone making machines have allowed International Standards to be comfortably met.

Technical Parameters:

Model	GG25
Capacity	2500pcs/h
Finished Product Size(22.5°)	42-48mm
	100-115
Power	12KW
LPG consumption	4kg/h
Compressed air pressure	0.6MPA
Compressed air consumption	6 MPa
Weight	3000kg
Outline size	3000*2000*1680mm
