KC-280 Liquid filling machine

GFK series CNC liquid filling machine is to use a computer for the micro water pump on the factors such as filling time, motor speed control, to achieve uniform, repetitive error minimal liquid filling way, widely used in medicine, chemical, food, beverage, grease, cosmetics and other industries, applicable to the low viscosity, no particles of liquid packing, small batch production.

The machine pumps pump body using a variety of imported materials synthesis of corrosion resistance, pump body and motor separation, no mechanical metal parts, no wear and tear in the pump body. Oil, heat resistance, acid resistance, alkali resistance, corrosion resistance, chemical resistance and other properties. This pump taking advantages of self-priming pump and chemical pump, self-priming function, thermal protection, smooth operation, long continuous idling, and long continuous running load, etc.

Technical Parameters:

- Model: KC-280 liquid filling machine
- Power supply: 220V50Hz or 110 v 60Hz (Optional, the price here is for 220V, if you need 110V, please feel free to contact me for a best price.)
- Power: 30W
- Maximum filling range: 5 ml to 3500 ml
- Biggest suction Distance: 2 meter
- Maximum flow speed: 3.2 L/min
- Repetitive error: < 0.5%
- Discharging drip tight function: YES
- Power off memory function: YES
- Weight: 5.5 Kg
