

CGN208-D Semi Automatic Capsule Filling Machine

Features:

1. Semi-Automatic Capsule Filling Machine is a new type of medicine filling machine with novel structure and attractive appearance.
2. Under both electrical and pneumatic control and equipped with an automatic electronic counter and computer-controlled speed-adjusting device, the machine can accomplish the positioning, separation and locking etc. of capsules.
3. In place of manual capsule-filling, it can reduce labor intensity and raise productivity. Its filling amounts are accurate and up to sanitary standards for pharmaceuticals.
4. The machine consists of capsule-feeding, U-turning and separating mechanism, material medicine-filling mechanism, locking device, electronic speed varying and adjusting mechanism, electrical and pneumatic control system protection device as well as accessories such as vacuum pump and air pump.
5. China machine-made capsules or the imported are applicable to this machine, with which the finished product qualification rate can be above 97%.

Technical parameter

Capacity	1000-25000 pcs/hour
Machine weight	450Kgs
Machine Dimensions	1140x700x1630
Total power	4KW
Filling formulation	Power(no wet and viscosity); small Granules
Air pressure	0.03m ³ /min 0.7Mpa
Vacuum pump	(Pumping rate)40m ³ /h
Suitable for Capsule	000、00.0, 1, 2, 3, 4
