YX-PF10 Semi Automatic Vacuum 10 Heads Rotary Filling Machine

YX-PF10 Semi Automatic Vacuum 10 Heads Rotary Filling Machine characteristics:

- This machine adopts vacuum type filling and fixed liquid level type filling, thus avoiding the different levels caused by the thickness of each container bottom.
- The machine is with 10 heads filling, and rotary type filling, which has speeded up and meanwhile saved a lot of spaces.
- The filling nozzle number can be customized, like 6 heads, 8 heads, 10heads etc.
- The vacuum perfume filling machine also is equipped with a recycle system, which saves a lot of time and labor density.
- Negative pressure suction fluid filling, product filling quantity to liquid level height is the metering method.
- The contact part adopt 316L stainless steel, table with SS 304.
- Suitable for glass bottle and the plastic bottle which will not easy out of shape after vacuum.
- Quality Control: IQC (Incoming Quality Check), IPQC (In-Process Quality Check), OQC (Outgoing Quality Check), FQC (Final Quality Check)

YX-PF10	
Filling Volume	10
Filling speed	1000~3000b/h
Production capacity	20-50bot/min
Filling volume	30~500ml
Supply voltage	3/N AC380V/220V
N.W	900kg
Dimension	1168*1168*2000mm
Single machine noise	≤70dB
