

BS-4020 Vertical Film Shrink Machine

The far-infrared shrink packaging machine is the latest automatic continuous shrink packaging equipment in the domestic market. The shrink temperature and motor drive speed are stable and controllable, the adjustment range is wide, and there are instrument displays. The original roller auto-transmission device can work continuously.

Features:

1. Using far-infrared tube for heating, saving more than 15%
2. Advanced design, stable and reliable performance, efficient power saving, good shrinkage effect, novel and beautiful structure, convenient operation and maintenance, etc.

Note: It is not suitable for PE.

Parameter:

Model	BS-4020
Voltage	220/380V 50Hz
Power	6KW
Loading	7KG
Speed	0-10m/min
Material	PVC
Machine Size	1200*850*400mm
Weight	60kg
